

# Aktuelle Anwendungen der EPR-Spektroskopie

SoSe 2022

| Datum  | Name                            | Topic   |
|--------|---------------------------------|---|
| 20.04. | Burkhard Endeward               | Pulse EPR Spectrometer - Hardware and Related Topics  |
| 27.04. | Thomas Prisner                  | PELDOR with more than two spinlabels  |
| 04.05. | Orawan Jakdetchai               | Structure and dynamics investigation of poly(A) RNA by EPR spectroscopy                           |
| 11.05. | Andrei Kuzhelev                 | Solid-like Dynamic Nuclear Polarization Observed in the Fluid Phase of Lipid Bilayers at 9.4 T    |
| 25.05. | Jie Zhang                       | The structure and dynamic conformational changes of SARS-COV-2 3'UTR                              |
| 01.06. | Michael Rudolph                 | Kinetics of an ABC exporter reconstituted in different membrane mimetics                          |
| 08.06. | Deniz Sezer                     | Simple DNA and RNA helix models for PELDOR  |
| 22.06. | Vasyl Denysenkov/<br>Danhua Dai | The new DNP probehead for liquids at 9.4 Tesla opens new opportunities in our research            |
| 29.06. | Amin Fahim                      | Conformational space of the major periplasmic chaperone SurA                                      |
| 06.07. | Chenxi Sun                      | Comparison of helical dynamics of dsDNA and dsRNA:<br>comparison of experimental and modeled data |

Zeit: mittwochs, 12:00-13:00, Raum: N100/015
